

Blood Typing Permission Slip

Hello parents of biology students,

During our study of **Chapter 7, Genetics**, students can determine their own blood type using a Blood Typing kit I've purchased from a science supply company. This is an easy, painless process.

The kits contain simple blood-typing cards and reagents which require only a finger prick of blood, using a safety lancet and a micropipette.

We will be blood typing on January 14. Please sign below so that your student may participate and remind him/her to bring this form to class on January 7.

Thank you!

Mrs. B

I give my permission for _____ to participate in the high school biology "Blood Typing Lab" on January 14, 2026.
